

BNSF Lumber Mill Guide

Because of our superior equipment and service, BNSF plays a major role in the transportation of lumber in the Western United States. We are the only North American railroad with direct access to the lumber producing areas of the Pacific Northwest and Western Canada. With unrivaled access to major metropolitan areas across North America, we can help customers access major Northeastern and Southeastern markets as well.

The following directory highlights BNSF-served lumber mills with location, product line(s) and species handled information. It also includes a separate list of reload facilities as well as Canadian mills operating in British Columbia.
